Mutlu Koçak

Software Engineer

Prague

I consider myself as a citizen of the world, Computer Scientist & Engineer, and php and cakephp Expert. I really like jQuery too. I code PHP and web applications since dial-up years (2001). I like to contribute and create open source software projects. I am always willing to learn new things even though I have 14 years of experience. I also design as a hobby. Other than coding and design, I like music, play guitar and drums, singing in choirs since I was 7. I believe in science and I am a woman who believes in equal opportunity for everyone. So I help women, lgbt people and students free of charge. I am also a Zend Certified PHP Engineer http://www.zend.com/en/yellow-pages/ZEND024677 I contribute to PHP source here is my accepted RFC. https://wiki.php.net/rfc/null_coalesce_equal_operator http://www.mynameismidori.com
